

# EXPLORING FRONTIERS

*Tucson, Arizona*

Hi again, we're on the road with the DOE  
Office of Science visiting our science  
projects across the globe - and universe!  
Today, we're still reeling from the view  
we experienced when the dome of the  
Mayall Telescope opened. The Whirlpool  
Galaxy you see on the front of this  
card was the result of the "first light"  
of the Dark Energy Spectroscopic  
Instrument, known to astronomers as DESI.

Scientists believe that the DESI images will provide insight  
into dark energy. It'll be hard to sleep tonight after all this  
galactic excitement!

Wish you were here ...
